

DEPENDABLE **DATA & INTERNET** SERVICES

DATA AND INTERNET SERVICES

GTB's data and internet customers benefit from professionally managed systems that are perfectly suited to their specific business needs. You'll personally meet with our trained specialists to determine your current and future requirements. We'll keep you connected with your customers and protect your valuable data from malicious attackers.

EMAIL

GTB's flexible Email packages can be easily customized to meet any need. You and your staff will enjoy remote access to Email so you can keep communication lines open, even while on the road. GTB deploys state-of-the-art spam filtering and virus protection to keep your service secure and connected.

FAX-TU-MAIL

GTB's innovative FaxTuMail service is an effective way of managing your faxing needs. Users are provided with a virtual fax number that receives and instantly converts in-bound faxes to a convenient PDF, which, in turn, is forwarded to their Email account. FaxTuMail allows you to receive faxes remotely, eliminates privacy concerns and increases productivity. Outbound faxes are easily sent by attaching the file with any standard Email application.

NETWORK SECURITY

GTB takes your network security seriously. We deploy an array of security methods to foil hackers, identity thieves, spammers and saboteurs. With firewall protection that makes your company's PCs invisible, Email scanning to prevent attacks, and real-time Internet virus detection, GTB has your security needs covered.

REMOTE BACK-UP

Increasingly, today's businesses regard data as one of their greatest assets. With GTB's exclusive "StrongBox" remote backup service, you'll have a low cost and convenient way to store vital information at our secure offsite location. Through GTB's use of data encryption and convenient back-up scheduling options, you'll not only be protected from loss, but you will receive peace of mind knowing that you have added an extra layer of protection to your data. GTB's remote backup service also helps you stay compliant with laws, regulations and industry standards (e.g., HIPAA, SOX, and SAS 70) that apply to offsite electronic data storage.

WEB HOSTING

Your company's Internet presence is vital in today's competitive marketplace. GTB's Web hosting service is a reliable and economical solution to make your company "web-ready."

SOLUTIONS FOR THE MODERN BUSINESS

GTB is one of Maryland's oldest facility-based telecommunications companies. We've been providing data and internet service to small and mid-sized businesses in the area since 1992.

GTB's privately managed network is monitored 24/7/365 by our own personnel to ensure connectivity and protect you from intrusion. We understand the vital importance of protecting proprietary information, maintaining financial records and complying with privacy laws and regulations. We have invested substantial resources to safeguard your business from security threats. GTB is constantly updating technologies to protect your data and network operations.
